To: whom it may concern

I am writting this letter in concern to the issue of the federal Regulations. I feel that 25 dollars is at most a small sacrafice to ask a person who stands to change his/her life & family. If there not willing to strive to obtain such a fee then it shows there determine to better themselves and if they dont care that much about there own then how can you expect in this dangerous field to be cautious enough with other people lives this is a brother hood of familys who produce base on our ability to work well with others. I urge you to reconsider

Thank You,
