Dear Sir or Madam:

I would like to take this opportunity to offer you some useful information about the asbestos exposure associated with the demolition/renovation of buildings in your locality. A copy and updates to Part 56 of Title 12 of the Official Compilation of Codes, Rules and Regulations of the State of New York (Cited as 12 NYCRR Part 56), a Guidance Document with frequently asked questions and answers, and variance information may be obtained by going on-line to, www.labor.ny.gov/workerprotection/safetyhealth/dosh_asbestos.shtm.

I wish to request your assistance in our enforcement efforts thereby protecting the health of your community, specifically in the area of building demolition/renovations. Please feel free to incorporate the enclosed: BUILDING DEMOLITION/RENOVATION and NOTICE TO BUILDING PERMIT APPLICANTS with the information you provided to contractors when a demolition/renovation permit is issued.

Should you have any questions, please contact the Asbestos Control Bureau District Office nearest to you (listed on the enclosed sheet).
CONTACT INFORMATION FOR ASBESTOS PROJECTS

The Department of Labor regulates asbestos abatement activities in the State through its Asbestos Control Bureau; all contractors must be licensed and all asbestos handlers certified by the Department’s License and Certificate Unit. Projects must be conducted in accordance with safety standards promulgated by the Commissioner of Labor to avoid potential public health hazards that can result from the improper handling of asbestos or asbestos containing material, a potential carcinogen. A copy and update to Part 56 of Title 12 of the Official Compilation of Codes, Rules and Regulations of the State of New York (Cited as 12 NYCRR Part 56), a Guidance Document with frequently asked questions and answers, and variance information may be obtained by going on-line to, http://labor.ny.gov/workerprotection/safetyhealth/DOSH_ASBESTOS.shtm

TO SUBMIT:
ASBESTOS PROJECT NOTIFICATION AND/OR EMERGENCY NOTIFICATION

Asbestos project notifications may be submitted on-line by licensed asbestos contractors by going to: http://www.labor.ny.gov and click on Businesses and then Asbestos Notifications under Online Services. Emergency notifications must be either submitted by email to asbestosnotification@labor.ny.gov or faxed to (518) 485-8530. After the emergency notification has been approved, the contractor must complete the on-line notification and pay the notification fee. You may also mail in your paperwork to: NYS Department of Labor, State Office Campus, Building 12, Room 161, Albany, NY 12240, Tel: (518) 457-2735.

Questions about obtaining and/or renewing an Asbestos licenses or any type of Asbestos Certification may also be obtained from the Department of Labor, DOSH, License & Certificates.
BUILDING DEMOLITION/RENOVATION

Industrial Code Rule 56 established work practice, asbestos contractor license, and asbestos worker training and certification requirements that protect the public from cancer causing airborne asbestos fiber that can arise from various construction activities, including the demolition/renovation of a building. One very important aspect of the Code covers requirements that specifically address the potential public health hazards associated with the significant amount of airborne asbestos fiber that can be released during the demolition/renovation of a building that contains asbestos or asbestos-containing materials.

New York State Labor Law (Article 10, Section 241 section 241.10) and the Code require a survey of the impacted portion of the building to identify the presence of asbestos prior to advertising for bids or contracting for or commencing work on any demolition/renovation work on a building. The Code requires that this survey must be sent to the local government unit responsible for issuing the demolition/renovation permit. Note that only copies of the demolition or pre-demolition survey must be sent to the Department of Labor, Asbestos Control Bureau. Also, prior to commencement of demolition/renovation work, the impacted asbestos identified in the survey must be removed in compliance with the Code. Your assistance, as specified below, would facilitate our enforcement efforts and help avoid the necessity of citing building owners who violate the statute and code:

1. Share this information with the individuals on your staff responsible for issuing demolition/renovation permits. Encourage your staff to contact the appropriate District Office of the Asbestos Control Bureau on the enclosed list should any asbestos issues arise, specifically those related to demolition/renovation.

2. Consider establishing a policy of not issuing a demolition/renovation permit until compliance with Industrial Code Rule 56 is achieved.

3. Call the appropriate District Office of the Asbestos Control Bureau when a demolition/renovation permit is issued to a contractor that has failed to provide a survey or has not removed the identified asbestos. Any cooperation you can provide will not only assist in our enforcement efforts but protect the health of your community.
NOTICE TO BUILDING PERMIT APPLICANTS

An asbestos survey is required for all renovation, remodeling, repair and demolition of all interior and exterior building materials. As per NYS Industrial Code Rule 56, asbestos material must be abated by licensed contractors utilizing certified asbestos handlers, with the exception of owner-occupied single family homes, where the owner may remove the asbestos. However, it is not recommended that the owner remove asbestos. The owner could potentially expose themselves, their family and neighbors to asbestos fibers if correct engineering controls and work methods are not utilized during the abatement.

For further information and updates, please see the NYS website at: www.labor.ny.gov.
