

Pyrotechnicians:

Pyrotechnicians must have 3 years of experience, be at least 21 years of age and pass a written exam to become certified.

- for Class A certificates, the candidate must have participated in the set up and loading of at least 5 proximate audience shows and in the performance of 5 non-proximate audience shows;
- for Class B certificates, the candidate must have participated in at least 5 non-proximate audience shows;
- for Class C certificates, the candidate must have participated the set up and loading of at least 5 proximate audience shows.

The application process also includes a criminal background check and mental health screening. The certification is to protect the public from the hazards associated with pyrotechnics.
